

WORKWEAR & PROTECTIVE CLOTHING

PORTFOLIO · CAPABILITY & PRODUCTION

PORTFOLIO

The Factory Behind the Catalogue

Safe-T TECH International is an OEM / ODM manufacturer in **Sialkot, Pakistan**, producing workwear and protective clothing for European programmes. **30 people**, one roof: pattern, cutting, stitching, finishing, quality control and packing — nothing outsourced, so the specification you approve is the garment you receive.

30
Employees across cutting, stitching, finishing, QC

100%
In-house — cutting to final packing

7–10 days
Sampling from tech file

20 pcs
Trial minimum per style

AQL 2.5
Final inspection on every order

EU
European size runs, ratios and labelling

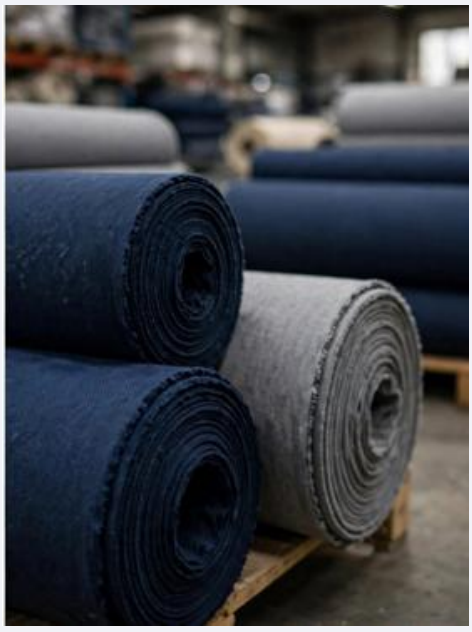

The team. Machinists, finishers and QC staff on the workwear lines.

IN-HOUSE PRODUCTION

Fabric In, Finished Garments Out

Production starts with cloth and ends with a packed, labelled garment — every step inside our own building.

Fabric store. Workwear twills, fleece and technical fabrics held for running programmes; every delivery checked for weight, shade and defects before cutting.

Embroidery in-house. Logos, names and department marks stitched on our own machines — no outside embroidery step, no delay.

YOUR CURRENT INQUIRY

Sweatshirts — 250 g/m²

The opening styles of your inquiry, produced exactly to your fabric, weight and size ratio.

Orange. Zip-front sweatshirt, cotton 62% / polyester 35% / elastane 3%, transfer reflective bands around torso and sleeves.

Yellow. The same construction in fluorescent yellow — one pattern, two warning colourways.

YOUR CURRENT INQUIRY

T-Shirts — 160 g/m²

Orange. Cotton-poly jersey, transfer bands front and back.

Yellow / navy. Two-tone body; navy panel hides workplace soiling.

Black / yellow. Contrast yoke and band layout for logistics programmes.

YOUR CURRENT INQUIRY

Polar Fleece — 280 & 340 g/m²

280 g/m² — yellow / black. 100% polyester polar fleece, anti-pill, zip front, transfer reflective bands.

280 g/m² — orange / navy. Same pattern and ratio, second colourway.

340 g/m² — yellow / black. The heavyweight execution for the cold season.

340 g/m² — orange / navy. Maximum warmth in the fleece range.

YOUR CURRENT INQUIRY

Trousers & Shorts — 245 g/m²

Trousers — navy / orange. Triple stitching, reflective leg band, EU 46–62.

Trousers — black / lime. One pattern, two colourways.

Shorts — navy / orange. The trouser block, warm-season cut.

Shorts — black / lime. Completing the four-piece bottom range.

YOUR CURRENT INQUIRY

Softshell — 300 g/m²

The fourteenth style of the inquiry — and the bridge to the wider warning-clothing range in our catalogue.

Hi-vis softshell jacket. Three-layer bonded softshell, transfer reflective bands that flex with the shell — windproof warning protection without hard-shell weight. Full front zip, zip pockets, adjustable cuffs and hem; sizes S–XXXL on your issued ratio.

PROTECTIVE CLOTHING

Worksuits — Two Colourways

Worksuit, navy. Heavy twill, triple feldlock seams, eight utility pockets, action back pleats.

Second colourway. The same construction across the colour range of a programme.

PROTECTIVE CLOTHING

Jacket & Bib Pants

Work jacket. Concealed zip and snap placket, chest and sleeve pockets, elasticated side waist.

Bib pants. Adjustable braces, bib pocket, knee-pad pockets, triple-stitched seams.

PROTECTIVE CLOTHING

Trousers, Shorts & Vest

Work trousers. Reinforced knees, cargo and phone pockets.

Work shorts. The trouser block in a warm-season cut.

Multi-pocket vest. Carrying capacity without jacket bulk.

PROTECTIVE CLOTHING

Tops — Polos, Sweats, Tees, Flannel

Polo shirts. Piqué 200–230 g/m², collars that stay flat.

Sweatshirts. Brushed fleece-back jersey, ribbed cuffs and hems.

Workwear T-shirts. Heavier jersey than promotional tees — built for the wash cycle.

Flannel shirts. Brushed cotton checks, the traditional work layer.

PROTECTIVE CLOTHING

Food Industry & Aprons

Food-industry clothing. Smooth constructions, concealed closures, white held through industrial laundering.

Aprons. Bib and waist aprons in washable and PU-coated executions.

PROTECTIVE CLOTHING

Flame-Retardant Programmes

Hot-work and welding programmes run on the same lines, with FR thread, covered closures and metal-free options.

FR protective coverall. Manufactured to the construction and material requirements of EN ISO 11611 / 11612 programmes, with antistatic executions to EN ISO 1149-5 requirements — fabrics nominated by the buyer, construction verified on the counter-sample.

MEDICAL SCRUBS

Women’s Range

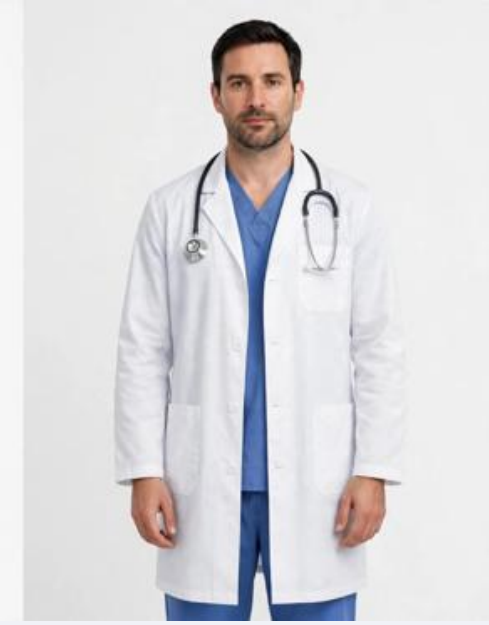

Scrub set. Shaped V-neck tunic, elastic-drawstring trousers, department colour coding.

Wrap scrub top. The tailored face of the scrub range.

MEDICAL SCRUBS

Men’s & Theatre

Men’s scrub set. Straighter block, same colourfast fabric family.

OT scrubs. Built for industrial laundering and autoclave cycles.

MEDICAL SCRUBS

Coats & Details

Doctor coats. Crisp poly-cotton twill, reinforced instrument pockets, name embroidery.

Scrub trouser detail. Elastic-drawstring waist, pockets placed for ward work.

GLOVES

Leather & Impact

Impact / rigging gloves. TPR dorsal shield, silicone grip palm, cut-resistant lining.

Leather rigging gloves. Split cowhide, reinforced palm, cuff options.

GLOVES

Coated & Specialist

Coated gloves. Seamless knitted liners, nitrile / latex / PU coatings.

Welding gauntlets. Split cowhide, heat-resistant stitching, fleece lining.

WARNING & WINTER

Hi-Vis Outerwear

Bomber 2-in-1. Detachable sleeves, quilted lining, two-tone execution.

Winter parka. Full-length waterproof warning coverage.

WARNING & WINTER

Rain & Insulation

Hi-vis rain jacket. PU-coated, sealed seams, reflective bands.

Insulated parka. Heavy padding for deep-cold outdoor work.

INSULATED CLOTHING

Fleece & Base Layers

Fleece jacket 320 g/m². Anti-pill polar fleece, zip pockets, stand collar.

Thermoactive underwear. Flatlock base layers that move moisture and hold warmth.

RAINWEAR

PU-Coated Range

Rain jacket. Welded / taped seams, storm flap, hood.

Rain set. Jacket and trousers packed as one labelled set.

QUALITY

Checked Before It Leaves

Every order passes the same route: fabric inspection on arrival, in-line checks during stitching, a measurement audit at finishing, and a **final inspection to AQL 2.5** before packing. The pre-shipment inspection is **documented — report and photographs included** with every order, so you see the goods as packed before they travel.

Your own inspector is equally welcome: buyers regularly nominate third-party inspection companies to verify orders on our premises, and we cooperate fully. Safe-T TECH also runs an independent inspection service for buyers producing elsewhere in Pakistan — Initial and During-Production inspections, Pre-Shipment / Final Random inspection, Container Loading Supervision and Factory Audits.

Standards framework

Garments are manufactured to the construction and material requirements of **EN ISO 13688, EN ISO 20471, EN ISO 11611, EN ISO 11612, EN ISO 1149-5, EN 17353, EN 342 and EN 14058** — the normative framework of European workwear programmes.

PRIVATE LABEL

Your Brand, Sewn In

We manufacture to your design and sew in your brand — the garments carry your identity from the first sample.

Your label inside. Woven brand labels, care and size labels, hang tags and carton marks — all produced to your artwork. “Made in [Your Country]” tags on request; otherwise “Made in Pakistan”.

Your fabrics. Nominated or swatch-matched fabrics, lab-dipped for approval before bulk cutting.

WORKING TOGETHER

From Tech File to Dispatch

1

Tech File

Send a tech file, sample garment or measured photographs.

2

Quotation

Quoted exactly against your specification and ratio.

3

Sample

Counter-sample in 7–10 working days, with measurement report.

4

Production

Fully in-house, with photo updates on request.

5

Inspection

Documented PSI with photographs; your inspector welcome.

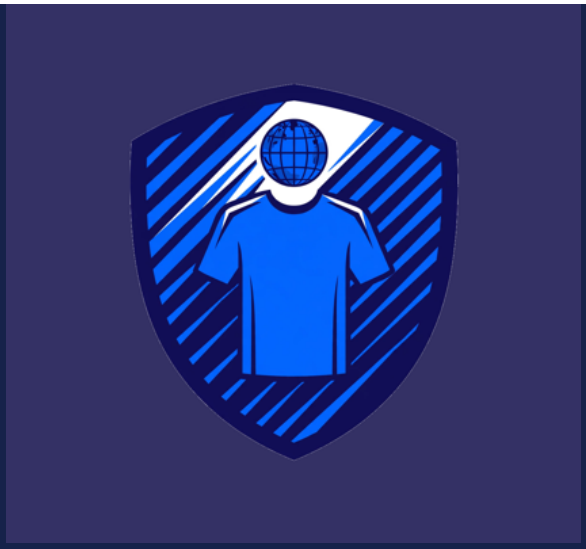

6

Dispatch

Ratio-packed, your labelling, on the agreed date.

Share your own design / tech file — we will manufacture it exactly for you.
